

Chubbsafes

GUARDIAN

The new Chubbsafes Guardian Mark V has been designed to meet the most modern and exacting International Standards ever adopted by Europe's leading safe testing authorities. The design provides large capacity and resistance against determined attacks by cutting tools, including the oxy-acetylene torch, drills and explosives. Many security features have been added and the safe is highly suited for use in the goldsmith trade, commercial jewellers, bank branches and commercial offices, for cash holdings where a higher level of protection is required.

SPECIFICATION

Door - Overall thickness 145 mm with a 75 mm barrier of Chubb F42 Polypropylene fibre concrete. Additional drill resistance over all critical points.

Body - Overall thickness 84 mm and constructed from inner and outer steel bodies uniquely anchoring and enclosing a jointless barrier material of Chubb F42 Polypropylene fibre concrete.

Locking - One 4-wheel combination lock (100 million variations) and one 8-lever keylock with nickel plated keys. Other variations are available.

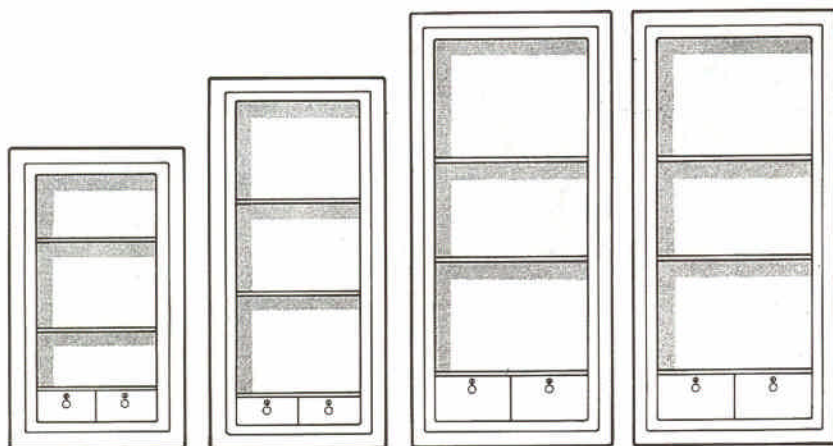

Boltwork - 32 mm moving bolts extend from 3 sides of the door. The hinge side is further protected by a full height dogging bar which engages into the body when the door is closed.

Explosive Protection - 2 relocking devices (one live and one dead relocking device) - set in the on - guard position when the safe is locked,

Base Fixing - Each Chubbsafes Guardian Mark V is prepared for anchoring to the floor by means of a security fixing bolt.
